

Research on Analysis, Control and Modelling of Modern Power Systems

The research of the EEH - Power Systems Laboratory is based on current problems and developments in the power industry and based on scientific methods and tools from system theory.

More detailed information is given in our [Research profile](#). Specific descriptions of research projects can be found in [Projects](#).

Further information on our research, given courses, travels by group members etc. are to be found in our annual reports. (Available Years: [2008](#), [2007](#), [2006](#), [2005](#), [2004](#), [2003](#), [2002](#), [2001](#), [2000](#), 1999, [1998](#), [1997](#) (pdf files) Please contact [Mrs. R. Zerjeski](#) for a printed copy.
